**Hamilton Elementary
Feedback on Opening**

November 30, 2023

The background of the slide is a black and white photograph of the Alexander Hamilton Early Childhood Center. The building is a single-story structure with a brick facade and a dark roof. A large, dark, semi-circular overhang covers the entrance area. To the right of the entrance, the name "ALEXANDER HAMILTON EARLY CHILDHOOD CENTER" is visible on the brick wall. A dark semi-transparent rectangle is overlaid on the center of the image, containing the agenda text.

Hamilton Elementary Opening

Highlighted in October Newsletter

IT STARTS WITH RELATIONSHIPS

Townline Elementary third grade teacher Stacey Beck greets her students each morning with a smile, high fives, and hugs. Her students can depend on her warm and genuine welcome each and every day. Beck, who is in her twenty-fourth year of teaching third grade at her school, is not alone. If you walk up and down the hallways of Townline, you will see her colleagues engaging with students in a similar fashion. In fact, warm welcomes are standard practice in classrooms throughout Kentwood Public Schools.

Building positive relationships plays a crucial role in student success. KPS has made building relationships a cornerstone of its work. Beck summarizes how genuine relationships with students in class positively impact student learning. "When students feel connected to adults, when they feel valued by adults, there are usually fewer behavioral problems," she says. "The students are then more willing to accept help in times of struggle. Positive relationships set the stage for academic and emotional success."

Positive relationships set the stage for academic and emotional success.

Building relationships is not only friendly greetings in the morning, although warm hellos can be a perfect way to

start the day for young learners. Instead, a good deal of intentional work goes on throughout the day to help foster positive relationships in Kentwood Public Schools.

A focus on relationships will truly prevent a lot of bad things from happening in schools.

WELCOME TO HAMILTON NEW ELEMENTARY SCHOOL PLANNED

Kentwood Public Schools is excited to announce two new construction projects that are in the beginning stages. In late September, district leaders presented plans to the Board of Education to do an extensive renovation of the current Hamilton Early Childhood building, turning it into a new elementary school, and also plans for a new Indoor Multipurpose building that will be utilized by athletic teams, student groups, and members of the community, among others.

It Starts with Relationships

Continued from page 1

Just down the hall from Beck's room, students in Fatmeh Mohamed's second grade classroom are busy taking part in a circle. They gather on the floor, sharing greetings with each other, and intently listening as each student answers a thought-provoking question. Circles are part of Restorative Practices, a larger initiative the district began last year, aimed at building community and also helping those who experience conflict rebuild trust.

In addition to Restorative Practices, Capturing Kids' Hearts (CKH) is a long-time program embraced by staff at Kentwood Public Schools. CKH also promotes a strong community, with students and staff working together to create a positive atmosphere for learning. Kentwood Public Schools consistently has several buildings named as Capturing Kids' Hearts National Showcase Schools because of the dedication our staff has for building positive relationships.

DITS

Finally, Positive Behavior Intervention and Supports (PBIS) is a system that promotes and rewards positive behavior choices by students. This, along with the other initiatives exists in meeting one of the goals of the district's strategic plan—creating whole-child

academic success, building relationships also impacts safety and security in the district. Callion Consultants, a national firm based in Grand Rapids that supports schools in safety and risk, building positive relationships plays in keeping schools safe. "One of the things that Kentwood Public Schools is the focus that is put on building strong relationships at all levels, relationships will truly prevent a lot of bad things from happening in schools."

Best practices, along with hellos, high-fives, and hugs in the morning and throughout the school's warm and welcoming place for each and every student, creating whole-child success.

WELCOME TO HAMILTON NEW ELEMENTARY SCHOOL PLANNED

Continued from page 1

The new Hamilton Elementary School will be the eleventh elementary school in the district. Kentwood is one of only three school districts in Kent County to show an increase in student enrollment, having the second highest percentage of increase during the past ten years. Enrollment will continue to expand as more homes are being built in our community, and even more are planned for the near future. The new school will have a dedicated space for an early childhood center to continue at the site, in addition to the new early childhood center under construction near Townline Elementary. District leaders will soon reach out to students, families, staff, and community members to get input on the many details that go into building and opening a new elementary school. The new Hamilton Elementary is tentatively set to open in the fall of 2025.

The Indoor Multipurpose Building will be constructed on the East Kentwood High School campus. It will include a large indoor field and track around the field that will be utilized in many ways. Sports teams, the marching band, fine arts groups and physical education classes will all be able to practice in the space. The indoor track will also be open to use by community members who are looking for a warm place to walk or run on those cold Michigan winter days!

The projects are funded through the 2021 bond proposal approved by the Kentwood community. "We are thankful to our community for their ongoing support of KPS," commented Superintendent Kevin Polston. "Stewardship of resources is a core value of KPS, and we take great pride in providing high-quality school facilities for our students and community. Our next projects will continue to provide exceptional learning environments for our students and community assets open and accessible for the entire Kentwood community."

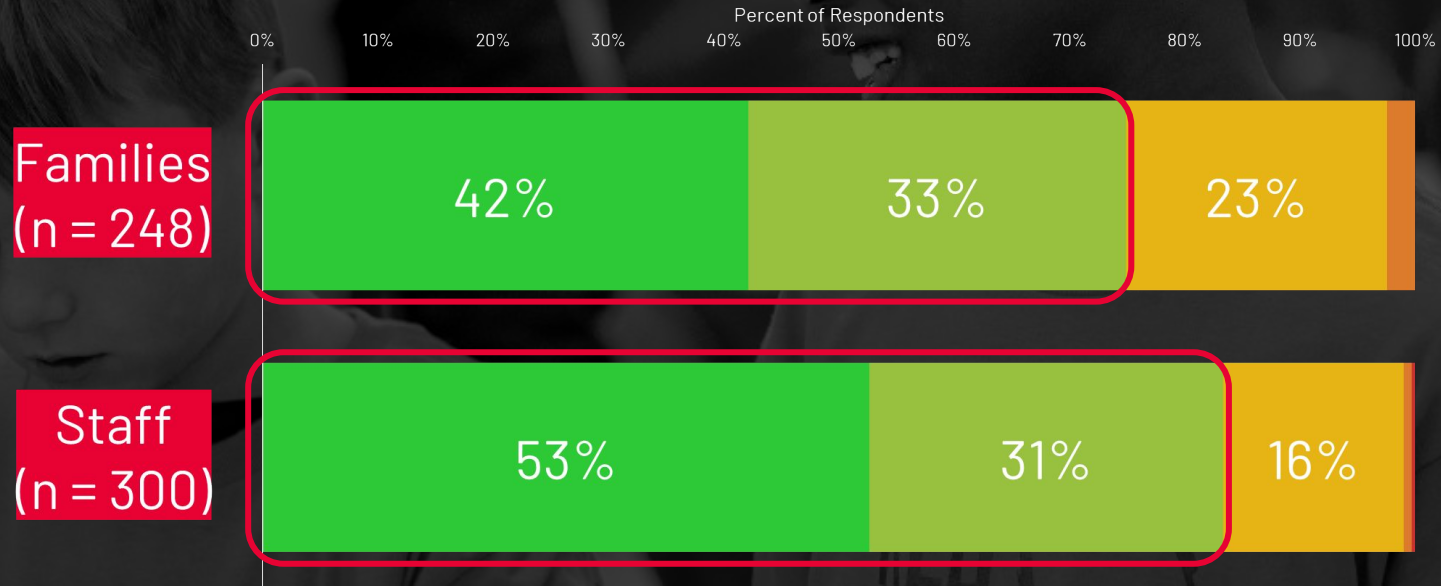

Both projects are in the earliest stages of design. More details will be shared with you as plans develop in the coming months.

Excellence in learning

The opening of Hamilton in 2025-26 presents a **golden opportunity** to bring **fresh, new learning approaches districtwide - beyond Hamilton.**

Opportunities for innovation in teaching and learning

- **21st Century Skills:** In a world that's **constantly changing**, our educational systems must **respond**. Innovation equips students with **adaptability, creativity, and problem-solving**.
- **Engagement:** New models **captivate** students by making learning **relevant to real-world contexts**.
- **Personalization & Empowerment:** Innovative models cater to **individual needs, empowering** students to have a **voice** and **ownership** in their **educational trajectories**.

Exploring innovative learning models

- **Project-Based Learning:** Encouraging students to engage in hands-on, real-world projects that promote critical thinking and problem-solving.
- **Arts Education:** Integrating fine arts to elevate creativity and innovation.
- **Competency-Based Education:** Advancing students based on their mastery of specific skills or knowledge rather than grade levels.
- **Internationally Recognized Programs:** Adopting a globally recognized instructional program tied to a worldwide school network.
- **STEM:** Integrating science, technology, engineering, and mathematics to advance critical thinking and collaboration.
- **Language Immersion:** Enabling foreign language fluency with immersion.

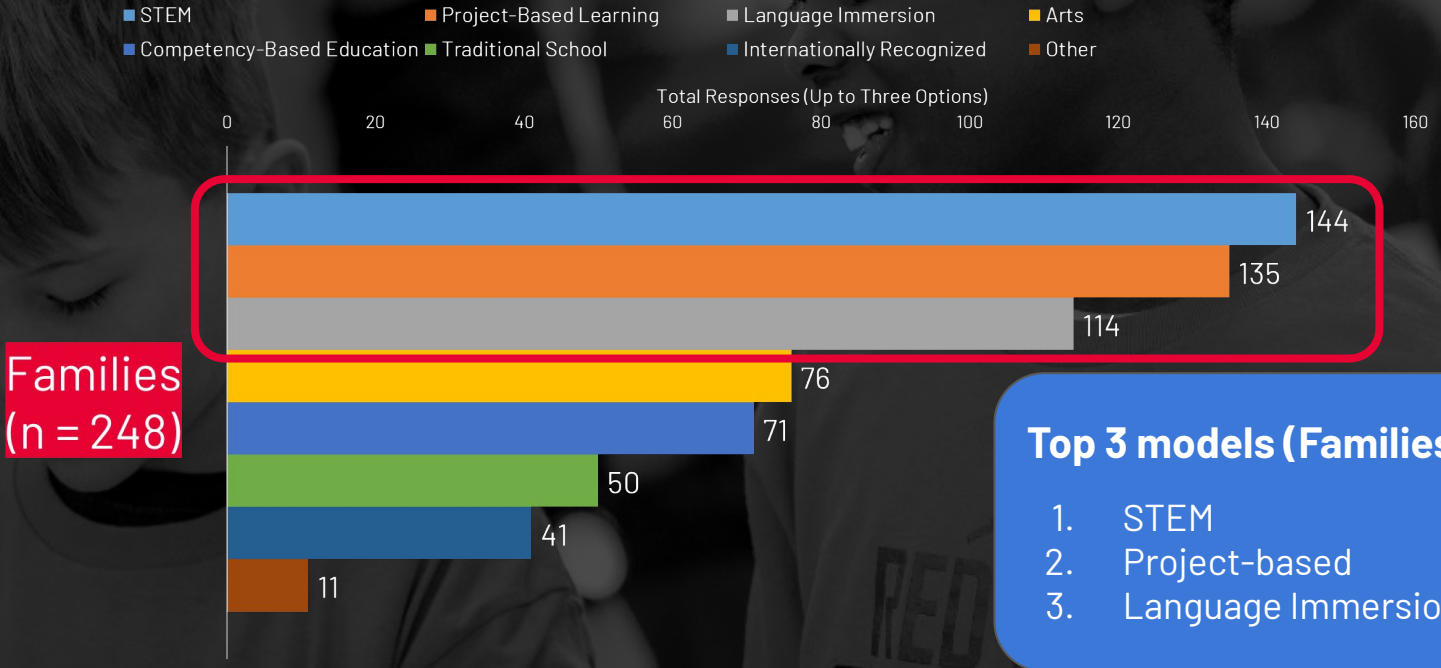

Mentimeter question

Which of these learning models resonated with you and why? Include other options if your preference wasn't listed.

STEM, Project-based & Immersion top models for families

Hamilton Elementary Opening Survey

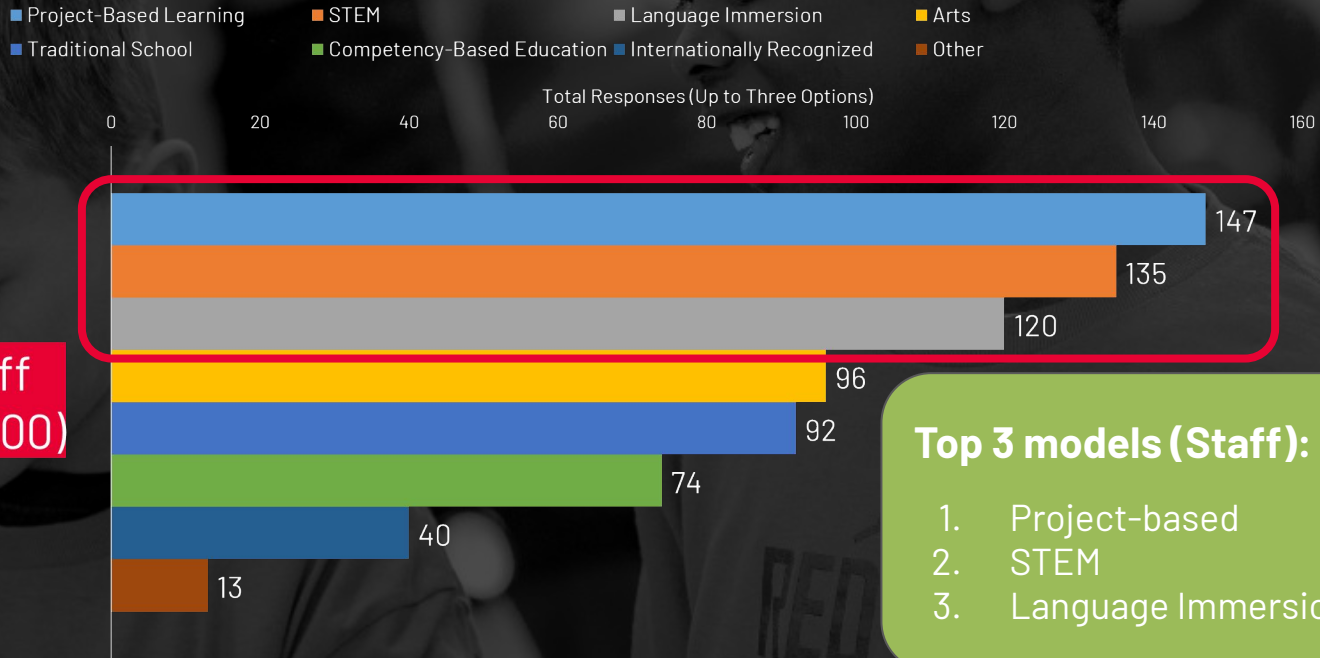

KPS should consider the following learning models to foster world-class learning.

Project-based learning, STEM & Immersion models for staff

Attendance zones

Revising KPS' elementary
attendance zones

VALLEYWOOD MIDDLE SCHOOL

A

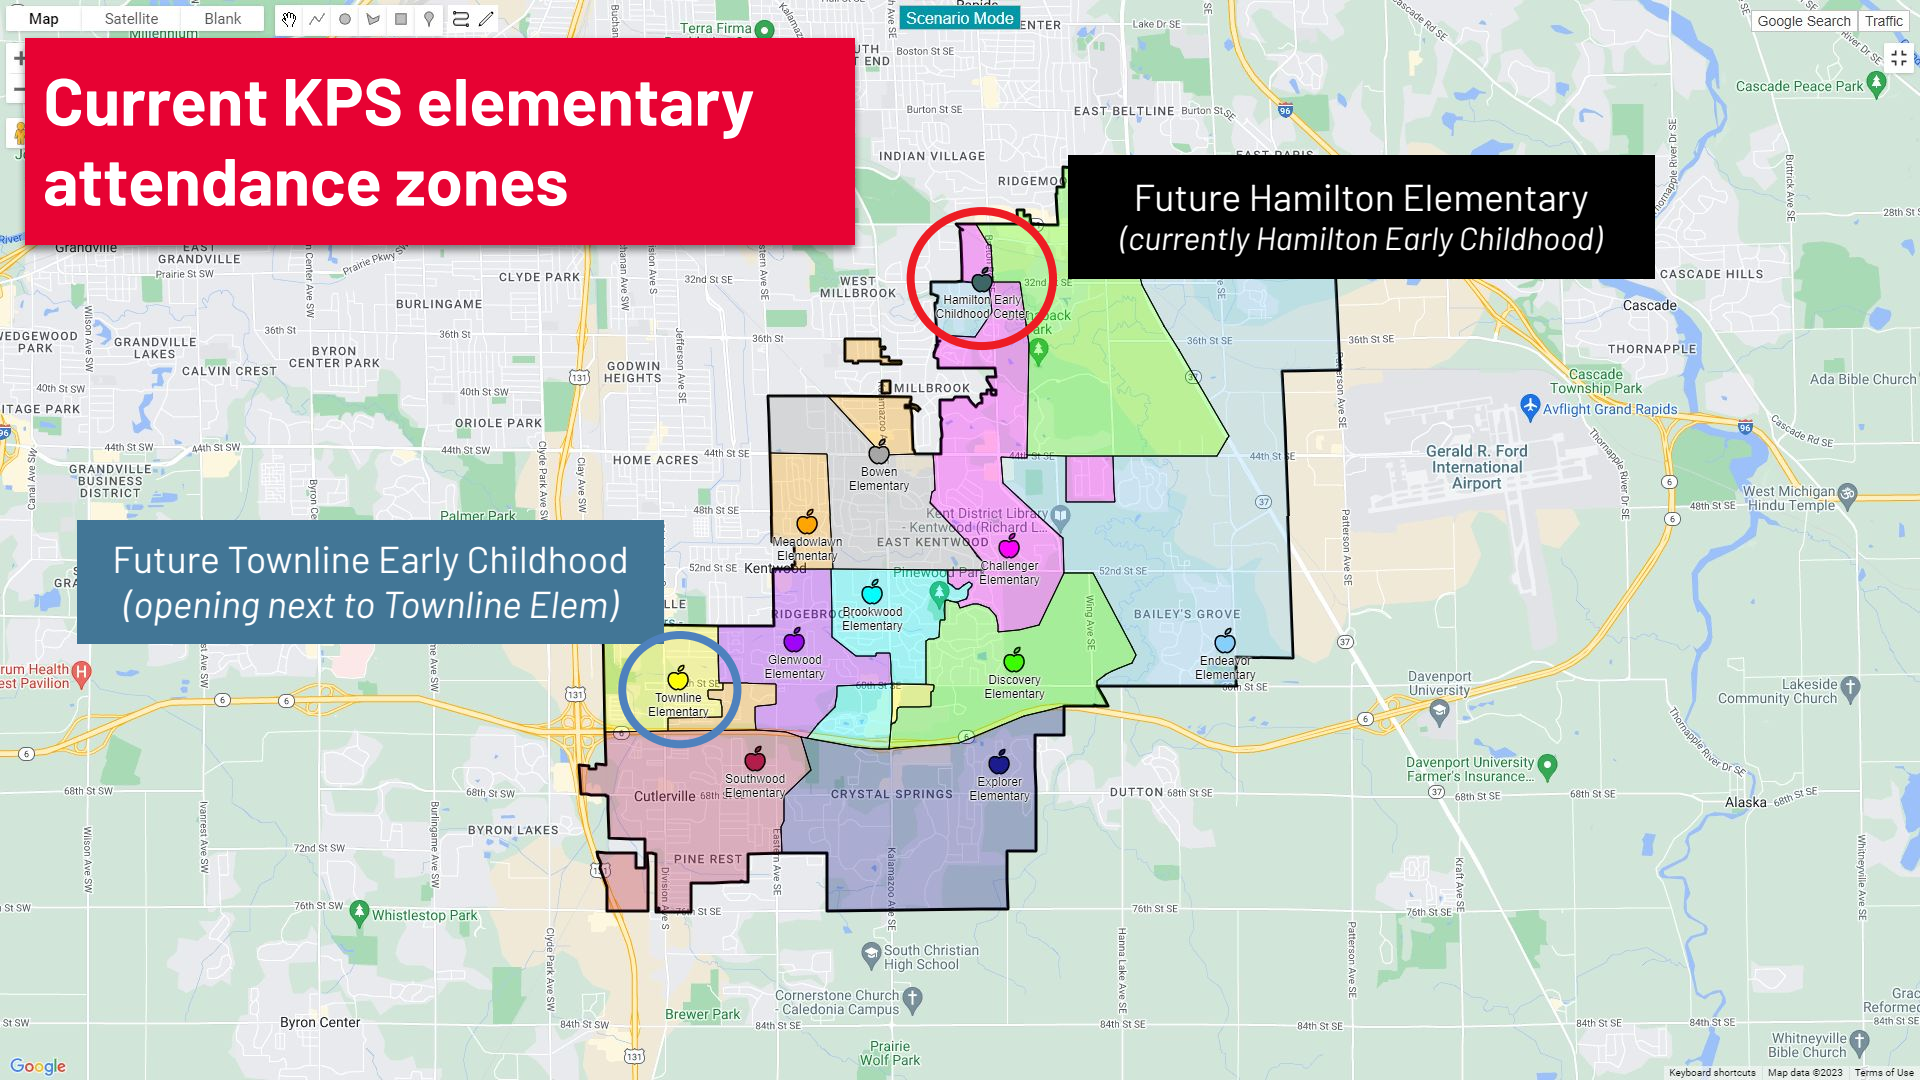

Revising attendance zones

- With the opening of **Hamilton**, we need to establish its **attendance zone**.
- The addition of our **11th school** requires **re-evaluation of zones** for the **other 10 elementary schools**.
- Your **feedback** is **essential**: We're gathering insights on the **priorities for this re-zoning process**.

Current KPS elementary attendance zones

Endeavor

Median Household Income varies widely across Kentwood Public Schools

Source: U.S. Census Bureau, 2021 American Community Survey 5-Year Estimates (B19013)
Note: Data refers to median household income in past 12-months (inflation-adjusted dollars to last year in 5-year range)

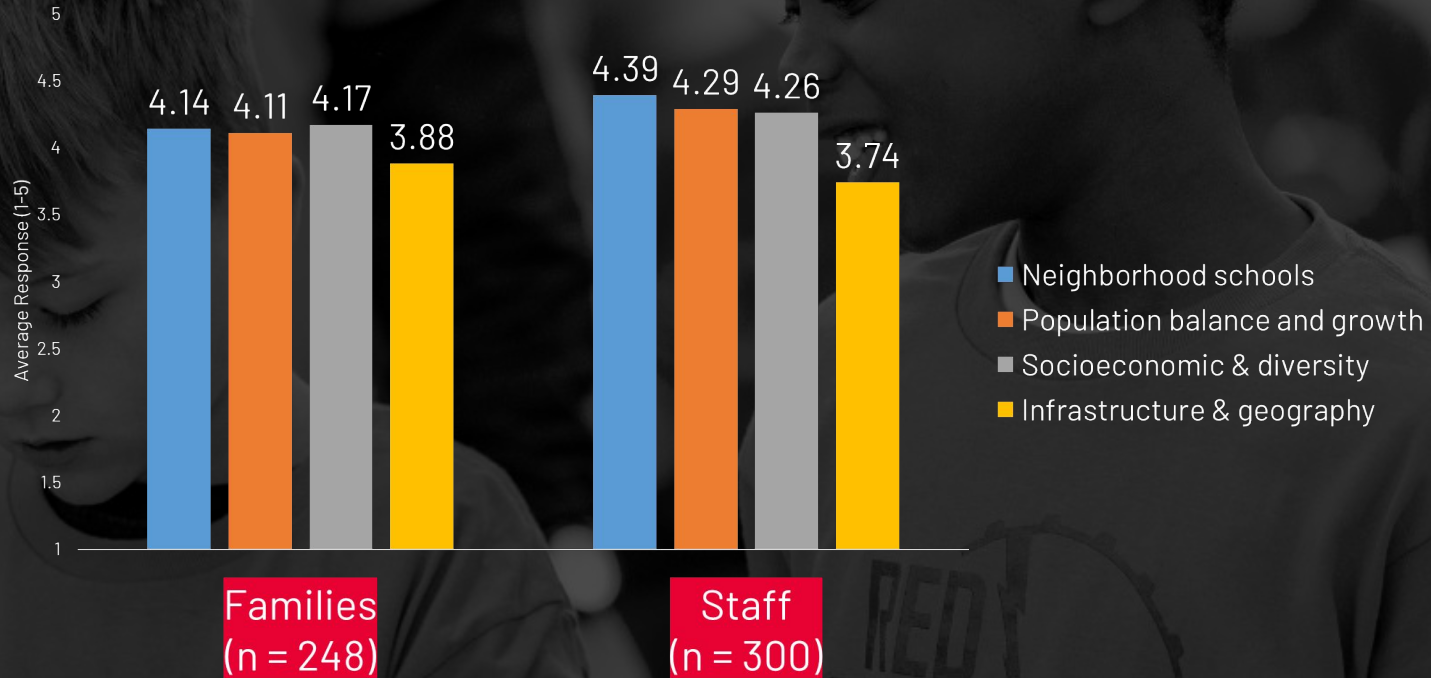

Priorities for elementary attendance zones

- **Neighborhood schools:** Students live close to their school.
- **Population balance and projected enrollment growth:** Balancing school size among all schools and considering future growth.
- **Socioeconomic and racial/ethnic diversity:** Ensuring diversity across each building.
- **Infrastructure and geography:** Taking into account major roads, development, and transportation routes.

HAMILTON ELEMENTARY (COMING 2025)

EXCELLENCE AND EQUITY IN EDUCATION

Welcome to the NEW Hamilton Elementary (Opening in 2025)

Welcome to the NEW Hamilton Elementary School, set to open for the 2025-26 school year! Hamilton Elementary will be the 11th elementary building in Kentwood Public Schools. The need for this building is pretty clear—Kentwood is a growing district. During the past 10 years, Kentwood Public Schools is one of only three districts in Kent County that has seen student enrollment increase. More students are anticipated in the years ahead as numerous new homes continue to be built in our community. We are proud that Kentwood Public Schools is a destination district for so many families. The tradition of excellence in our district is strong. The support we receive from our families and our community is robust. Kentwood Public Schools is committed to building upon this tradition and support, living up to our vision of Excellence and Equity in Education for each student, by providing an authentic caring environment where innovative learning takes place.

Located at 3303 Breton Road, SE, the Hamilton building, at one time, was an elementary school. During challenging economic times, the elementary building was closed. Currently, the building is home to the Hamilton Early Childhood Center. A new Early Childhood Center next to Townline Elementary is currently under construction, enabling the district, because of the growing student population, to return the Hamilton building to an elementary school.

An extensive renovation project will take place at Hamilton to ensure the new elementary school is at the same standard with the existing elementary buildings in our district. This will involve a new kitchen and gymnasium, updated classrooms and playground, as well as enhancements to safety at the building. In addition, a dedicated early childhood space will be created at the building, which will allow the new school to maintain an early childhood center to serve families in the area.

We plan to update the details on this page as the process to open the new Hamilton Elementary progresses in the coming months. For more information, please see these [Frequently Asked Questions](#) and the design drawings for the new building below.
